Set in the city of Thebes, Antigone, daughter of the doomed King Oedipus, defies the orders of the new king who proclaims one brother a hero and the other a usurper, leaving his limp body lying in the street as an example to those who dare act against the state. But when the sister of the slain young brothers protests the edict by burying her brother, she breaks faith with everything she has ever known in order to set things right. Her act of love and rebellion triggers a sequence of dramatic events, but it is Antigone's courage, bravery, and faith in love that redefines justice.

Please Be Considerate. Turn off cell phones & other digital devices. Ring tones are not the only problem. The light from digital devices distracts other patrons & the student performers. If you forget & your phone rings during the performance then turn it off; do not answer. You can check your messages during intermission. Additionally, food & drink are not permitted in the auditorium. Thank you for helping make this production a success.
